Security and Privacy

Hi, I'm trying to improve the security of my site and provide better ways to reach me.

Informal bug bounty

If you find any vulnerabilities on my websites, please let me know! You can reach me at <mailto:tonytash@pm.me>, please note that it may take me some time to reply. I don't have a security budget or a budget for running this site, but I'll try to make up for it.

Onion site

Now live. Access the wiki on sj6q53t6abbricvwnpnxsiz2kxltlueq4glozeltq45dhzoomdqd.onion for added security. Maybe broken. This is a low power server and the Tor socket has a tendency to stop working.

Update: currently offline since I'm using the port the TOR socket listens on for something else.

I2P site

This server is currently not on the I2P network. I will reconsider setting it up when I have time.

Todo list

- ~~Set up tor site~~ Done!
- Set up i2p site
- Fix peertube or odyssey
- Actually get owncast running w/o a simple proxy
- ~~Try to get JPEG-XL images here waiting on browser support first.~~

Ways to chat

- Email
 - Make sure to use my public key
 - Encrypt messages using key:

-----END PGP PUBLIC KEY BLOCK-----
```

- Yes it's a janky way of putting a public key, but it's here in case the Nextcloud share expires (or gets edited)
- I will fix this later.
- IRC
 - now on libera instead of freenode
- XMPP
- I have OTR for Matrix, IRC, Telegram, XMPP, and (maybe) Zuccbook, Discord and SIP if you notify me ahead of time.
- Mumble
 - On this server: tonytascioglu.com, default port
 - Login with password TechnoTonyMurmurServer1234 or something like that
