Convert .bin and .cue files into a .iso

I have a bunch of old family albums on DVDs (because they're old and flash drives were \$\$\$ back then). I transferred them, but some are in .bin/.cue format since they are multitrack. I have no idea how to mount these, but I can mount .iso on Linux so I needed to convert them.

I found this solution that worked: all 3 top solutions worked. [thread](#).
