Security and Privacy 2

Security and Privacy

Hi, I'm trying to improve the security of my site and provide better ways to reach me.

Informal bug bounty

If you find any vulnerabilities on my websites, please let me know! You can reach me at mailto:tonytash@pm.me, please note that it may take me some time to reply. I don't have a security budget or a budget for running this site, but I'll try to make up for it.

Onion site

Down again. Will fix one day.

**Update: ** currently offline since I'm using the port the TOR socket listens on for something else.

I2P site

Briefly was online but not maintained at the moment.

Todo list

- Set up tor site
- Set up i2p site
- Fix peertube or odyssey
- Actually get owncast running w/o a simple proxy
- ~~Try to get JPEG-XL images here~~ waiting on browser support first.

Ways to chat

- Email
    - Make sure to use my public key
    - Encrypt messages using key:

```
todo - put non-expired key
```

- Yes it's a janky way of putting a public key, but it's here in case the Nextcloud share expires (or gets edited)
- I will fix this later.
- IRC
    - now on libera instead of freenode
- XMPP
- <del>I have OTR for Matrix, IRC, Telegram, XMPP, and (maybe) Zuccbook, Discord and SIP if you notify me ahead of time. </del> nope. zucc will ban you for this.
- Mumble
    - No longer maintained. But please don't use discord.
