# Run games in HDR

If you don't like launching through steam.

Go to tty2 (or another tty), log in, go to game dir.

Run

```
DXVK_HDR=1 STEAM_MULTIPLE_XWAYLANDS=1 gamescope --hdr-enabled -0 DP-1 --  
proton run HorizonZeroDawn.exe
```

enjoy. You should see the HDR option enabled in your game.

KDE Plasma 6 beta has working HDR. Only issue is there's no HDR compatible app to take advantage of it.
